MORE news

After a year away from supplying valves to the Norwegian Oil & Gas market, we have decided to return with [MOREVALVES](#).

[MOREVALVES](#) act as a manufacturers agent, promoting BFE (Bonney Forge) and TAI Milano in Norway. Should you wish to discuss opportunities, valve requirements, products, distribution or more, feel free to contact [Mauro Carrara](#) or [Ivan Contu](#) directly, alternatively [Herlog Berge](#). More news to follow, about ONS-2016, our participation there, and more.

- Ball valves (Floating and Trunnion), class 150#-2500#, sizes 1/4"-24".
- API 6A valves (API No. 6A-0621) class 3000, 5000, 10000 and sizes 1.1/16", 2.9/16", 3.1/8" and 4.1/16".
- API 6D valves (API No. 6D-0463) class 150#-2500#, sizes 1/2"-6".
- Combination valves / Double Block & Bleed valves consisting of Gate-/Globe-/Check-/Ball-/Needle- configurations from 1/2" to 16", 150#-4500#.
- Gate-, Globe- and Check valves 1/2" to 2" (3" for class 150# gate) class 150#-4500#, in Bolted bonnet, Welded bonnet or Seal Welded bonnet design. Check valves supplied as Piston-, Ball- or Swing check.
- Pressure Seal Gate-, Globe- and Check valves from 1/2" and above, class 900#-2500#.

- Full Nozzle Pilot Operated Safety Valves
- Non-Flowing and Flowing type Pilot operated valves
- Full nozzle Spring loaded Safety Valves (all sizes in acc. with API 526)
- Cast valves with capacities exceeding API 526 «blocked body»
- Pilot Operated valves for WET GAS
- Steam Valves in acc. with ASME Sec. I
- Low pressure valves
- Changeover valves
- Rupture discs
